

# Another Nobel Prize Level Observation

Yu Wang (Don't Tell Others Who I Am)

April 2022

## 1 Conclusion

After years of experiments, we provide that the widely accepted Ohm's law (1) is correct only if we did the measurement correct. We think this is a breakthrough in the world of Electric Engineering, and this observation deserves a Nobel Prize.

$$V = IR \tag{1}$$

Please keep this secret between you and me.
